

Dear Applicant,

Congratulations on exploring your learning options with MAHE Manipal

Established in 1957, Manipal Institute of Technology (MIT), Manipal specializes in the fields of engineering, technology and innovation. Six decades of steady growth has seen MIT transform itself into an institution of global repute. Well-established alumni network and effective placement activities have reinforced the credibility of the institute in the professional arena. With a NIRF Rank of 45, MIT, Manipal has been consistently ranked among the top engineering colleges in India.

Manipal being a residential campus with its diverse student population transforms the academic ambience into an international university town. With more than 20 major technical projects, more than 80 technical and cultural clubs, MIT is also known as campus of experiential learning. At MIT, Manipal the learning experience transcends the classroom and becomes a culture in itself. Campus promotes unique mix of interdisciplinary & collaborative learning opportunities with participation from the sister institutes under the MAHE umbrella. Further, flexibility in terms of student mobility and research collaboration initiatives with top universities around the globe add to our strength.

We have 18 academic departments offering undergraduate, postgraduate, and doctoral degrees. With our vision **'Excellence in Technical Education through Innovation and Teamwork'** we aim to provide value-based quality education by providing emphasis on student-centric learning.

Your dream to get the best of the professional education and create a better future will certainly be supported in the best possible way by our institution. In normal circumstances, you could have visited the campus to experience the idea of MIT. However, considering your batch has witnessed the unprecedented uncertainties due to the prevailing pandemic, it is commendable that you are making an informed choice. We wish to assure you that with the quality of learning opportunities at MIT, you could certainly pursue excellence with your determination. To get a virtual glimpse of what MIT could offer, you are invited to go through the following links:
